Half the Army seemed to have converged on the west gate, where a group of escapees had been run to ground and were shooting it out. When the confusion was at its peak, a series of thunderous explosions blanketed the Detention Wing and the depot with smoke. When the smoke cleared, one of the transporters was gone. No one had been guarding the motor pool. "Wining, dining, and conspiring--no doubt until the early

hours." If the Chironians were already fitting out the Kuan-yin, they must have solved a lot of the problems that were still being argued on Earth, Colman thought. The whole planet, he realized as he reflected on it, was a powerhouse of progress, unchecked by any traditions of unreason and with no vested-interest obstructionists to hold it back. If the pattern continued until Chiron became a fully populated world, it would effectively leave Earth back in the Stone Age within a century. "Have you actually flown it anywhere yet?" he asked, turning his head toward Kath. "The Kuan-yin . Has it been anywhere since it arrived in orbit here?" .Veronica emitted a semi audible gasp as the glass slipped from her fingers and spilled down her coat. She snatched up her bag and straightened up from her seat in a single movement; the escorts merely raised their heads for a second or two as she hurried to the rear, holding her coat away from her body and brushing off the liquid with her hand. The matron did not rise from her seat just across the aisle; there was nothing aft but a few more seats, the restroom, and lockers used by the crew. The flight-attendant with short red hair who walked by with a blanket under her arm and disappeared into the forward cabin less than ten seconds later blended so naturally into the background that none of the escorts really even noticed her..Stern shrugged. "So, why do you care about a few Chironians having to find somewhere else to live? They have an entire planet, most of which is empty. They will hardly starve." "Stay," whispers the motherless boy..Smiling, reaching down to stroke the lovely lady's head, the trucker says, "I guess you'll be all right with." "I sure hope not, ma'am. "On Earth, a lot of people would see that as their big ambition in life." "SDs," Colman said at once. "It was- a professional job."..He wants the coins, too, but he doesn't touch them. Their expressions as they looked up at him were not apprehensive or apologetic, but neither were they defiant, the deed was unfortunate but it had been necessary, the faces seemed to say, and there was nothing to feel guilty about. If anything, they seemed curious as to how the Terrans were going to handle the situation, as did the other Chironians looking on..Despite having worked under him for several years, Fallows had never been able to master the art of feeling at ease in Merrick's presence. Displays of undue familiarity were hardly to be expected between echelon-six and echelon-four personnel, naturally, but even allowing for that, Fallows always found himself in acute discomfort within seconds of entering a room with Merrick in it, especially when nobody else was present. This time he wouldn't let it happen, he had resolved for the umpteenth time back in the corridor. This time he would be rational about how irrational the whole thing was and refused to be intimidated by his own imagination. Merrick had not singled him out as any special object of his disdain. He behaved that way with everybody. It didn't mean anything..Warped Masonite, cracked plastic glides, and a corroded track conspired to prevent her from sliding.."Were they ever there?" Leilani asked again..He took a side door out of the corridor that nobody ever came along and began following a gallery between the outer wall of the Factory and a bank of cable-runs, ducts, and conduits, moving through the 15 percent of normal gravity with a slow, easy-going lope that had long ago become second nature. Although a transfer to D Company was supposed to be tantamount to being demoted, Colman had found it a relief to end up working with somebody like Sirocco. Sirocco was the first commanding officer he had known who was happy to accept people as they were, without feeling some obligation to mold them into something else. He wasn't meddling and interfering all the time. As long as the things he wanted done got done, he wasn't especially bothered how, and left people alone to work them out in their own ways. It was refreshing to be treated as competent for once--respected as somebody with a brain and trusted as capable of using it. Most of the other men in the unit felt the same way. They were generally not the kind to put such sentiments into. words with great alacrity ? .. but it showed.."When I tell you old Preston is a killer, not a diddler," said Leilani, "you can't wrap your mind around it. Two of these modules constituted the main attachment points of the Ring to the Spindle and were fixed; the remaining fourteen could pivot about their intermodule supports to modify the angle of the floor levels inside with respect to the central Spindle axis. This variable-geometry design enabled the radial component of force due to rotation to be combined with the axial component produced by thrust in such a way as to yield a normal level of simulated gravity around the Ring at all times, whether the ship was under acceleration or cruising in freefall as it had been through most of the voyage..Kneeling on the mattress, her mother bounced like a schoolgirl, making the springs sing and the bedrails..tightly in his fist.
